USA	<p>NAME OF PRODUCT: Hollis DG03 Dive Computers</p> <p>UNITS: About 1,000</p> <p>DESCRIPTION The recall includes Hollis brand DG03 dive computers with serial numbers 100 through 1142 that may be used with integrated transmitters that monitor tank pressure. The round black 2-1/2 inch diameter computer has a digital screen and is worn on the diver's wrist like a watch. The name of the product, Hollis DG03, is printed on the front of the unit and the serial number is printed on the back of the unit. These computers allow scuba divers to measure the time and depth of a dive. Only dive computers with software labeled Revision 1A, viewed on the computer's display are included in the recall.</p> <p>IMPORTER Unknown</p> <p>MANUFACTURED IN: United States</p> 	<p>HAZARD: The dive computer, when used with an optional integrated transmitter, can malfunction and display an incorrect tank pressure reading to the diver. A diver could unknowingly deplete their air supply based on the reading, resulting in drowning.</p> <p>INCIDENTS/INJURIES Hollis has received two reports of dive computers malfunctioning. No injuries have been reported.</p>	<p>Consumers should stop using the recalled dive computers until the unit's operating system is upgraded to revision 1B. Consumers can download the upgrade from the firm's website or contact an authorized Hollis dealer for assistance.</p>
