USA	<p>NAME OF PRODUCT: Children’s and adult chests and dressers</p> <p>UNITS: About 8 million MALM chests and dressers and 21 million additional children’s and adult chests and dressers in the U.S. (In addition, 6.6 million were sold in Canada)</p> <p>DESCRIPTION WASHINGTON, D.C. – The U.S. Consumer Product Safety Commission (CPSC), in cooperation with IKEA North America, of Conshohocken, Pa., is announcing the recall of all chests and dressers that do not comply with the performance requirements of the U.S. voluntary industry standard (ASTM F2057-14). The recalled children’s chests and dressers are taller than 23.5 inches and adult chests and dressers are taller than 29.5 inches. The 29 million units of recalled chests and dressers include: MALM 3-drawer, 4-drawer, 5-drawer and three 6-drawer models and other children’s and adult chests and dressers. The recalled chests and dressers are unstable if they are not properly anchored to the wall, posing a serious tip-over and entrapment hazard that can result in death or serious injuries to children. On July 22, 2015, CPSC and IKEA announced a repair program for the chests and dressers that included a free wall-anchoring repair kit for the MALM chests and dressers and other IKEA chests and dressers. Two tragic fatalities involving MALM chests and dressers occurred prior to the announcement of the repair program: In February 2014, a 2-year-old boy from West Chester, Pa. died after a 6-drawer. MALM chest tipped over and fatally pinned him against his bed. In June 2014, a 23-month-old boy from Snohomish, Wash. died after he became. Trapped beneath a 3-drawer MALM chest that tipped over. Subsequent to the July 2015 announcement, CPSC and IKEA learned of additional tip-over incidents, including a February 2016 incident in which a 22-month-old boy from Apple Valley, Minn. died when a MALM 6-drawer chest fell on top of him.</p> <p>None of the chests or dressers in the above-listed incidents had been anchored to the wall. In addition to the three deaths, IKEA received reports of 41 tip-over incidents involving the MALM chests and dressers, resulting in 17 injuries to children between the ages of 19 months and 10 years old. The MALM chests and dressers are constructed of particleboard or fiberboard and are white, birch (veneer), medium brown, black-brown, white stained oak (veneer), oak (veneer), pink, turquoise, grey, grey-turquoise, lilac, green, brown stained ash (veneer), and black. A 5-digit supplier number, 4-digit date stamp, IKEA logo, country of origin and “MALM” are printed on the underside of the top panel or inside the side panel.</p> <p>Since 1996, IKEA chests and dressers have been labeled to identify IKEA, the model name and the manufacturing date.</p> <p>IMPORTER None reported.</p> <p>MANUFACTURED IN: None reported.</p>	<p>HAZARD: The recalled chests and dressers are unstable if they are not properly anchored to the wall, posing a serious tip-over and entrapment hazard that can result in death or injuries to children.</p> <p>INCIDENTS/INJURIES None reported.</p>	None reported.

Inspection should be carried out in the manner described in the attached checking guide for consumers. If the buckle is cut, consumers should immediately stop using the carrier and contact Outdoor Agencies, Osprey’s Australian Distributor, for a free replacement or full refund. Consumers also may contact Outdoor Agencies to return the carrier for inspection. If the buckle is cut, consumers will receive a replacement or full refund. Contact Outdoor Agencies on 028717 7308, from 9 a.m. to 5 p.m. AEST.</p>
